**RE: Request for monitoring well maps, analytical data, well installation data
Mound Street PCB site, St. Louis, MO; Sverdrup Proj. No. 010865-37303**

Dear Ms. Fox:

Pursuant to our telephone conversation today, I am requesting file information and maps for the above captioned site in St. Louis. As I mentioned to you, Sverdrup Environmental, Inc. is under contract to the U.S. Environmental Protection Agency to conduct an investigation of the Mound Street site.

This site is located on the northwest corner of the block defined by Mound Street on the north, First Street on the west, Mullanphy Street on the south and by railroad tracks and the Mississippi River flood wall on the east (see attached map). We are especially interested in the monitoring wells as noted on the site map. In addition to the three Corp wells near the flood wall as depicted on the map, we are interested in any analytical information for samples from manholes designated as F-GA1 (#12), (#13) and (#14). The St. Louis Metropolitan Sewer District (MSD) believes that these manholes are controlled by the Corp even though the MSD sampled them during the 1993 flood. If you have a map of the monitoring wells and perhaps manholes between Mullanphy Street and Brooklyn Street, it would be beneficial to our investigation.

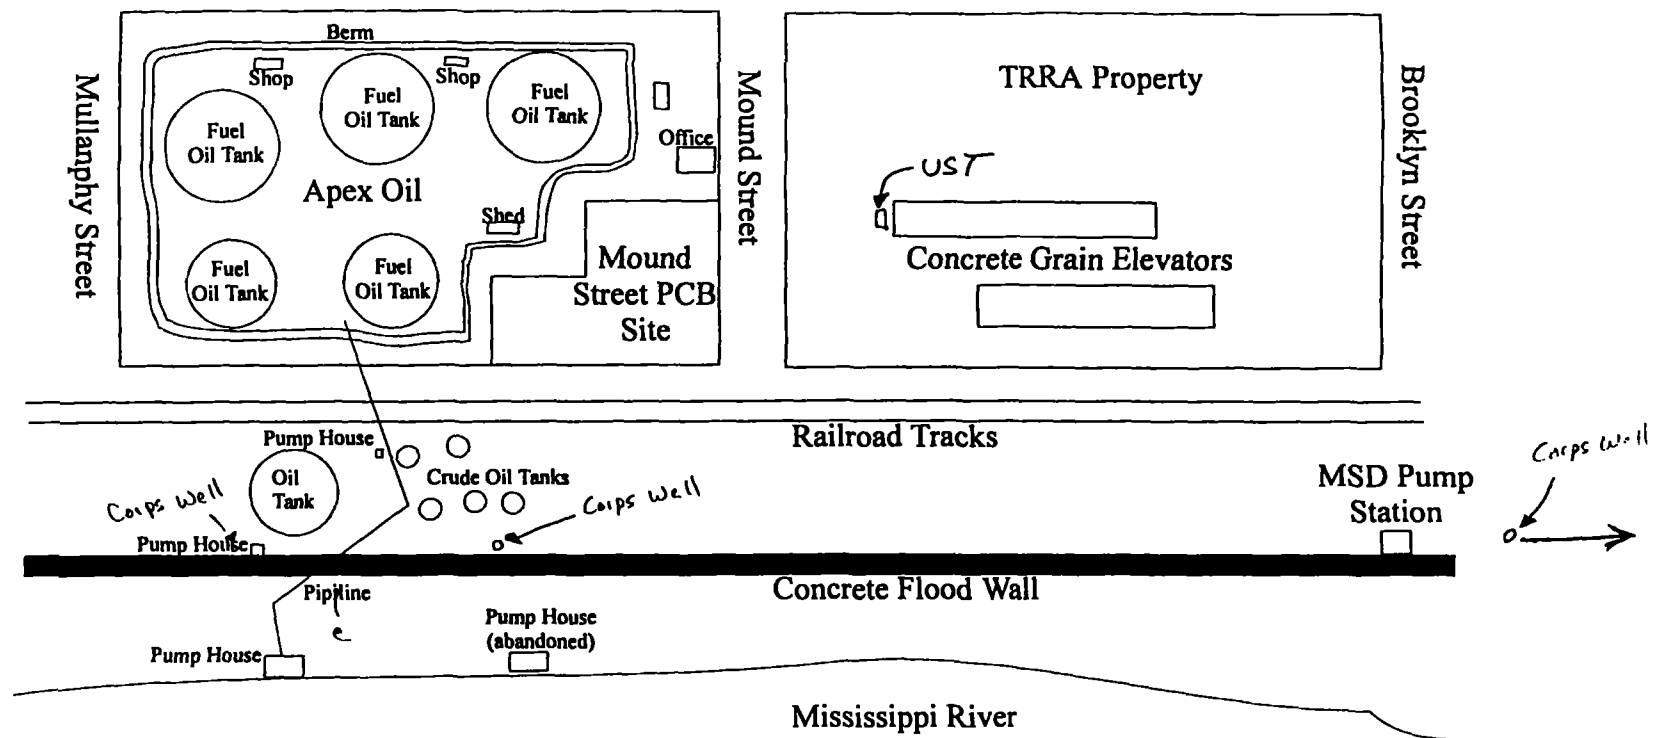

Please provide all analytical sampling data for wells and manholes in the vicinity of the Mound Street site. We also request installation data for wells including boring logs and construction information, and the name of a contact person so Sverdrup can properly access monitoring wells.

If you require additional information to fulfill this request, please call me at (913) 663-2105 or our main number at (913) 663-2101. Thank you for your efforts.

Sincerely,
SVERDRUP ENVIRONMENTAL, INC.

Michael T. May, Ph.D., P.G.
